Professional Summary

AI & ML engineering student (B.Tech, MSRIT, CGPA 9.41/10) with hands-on experience building and deploying machine learning, deep learning, and NLP systems in Python across bioinformatics, environmental monitoring, and conversational AI. Comfortable across the ML lifecycle — data preprocessing, model training and evaluation, and deployment — with working exposure to generative AI tools, prompt engineering, and full-stack integration (Flask, Firebase, React/Node). Strong fundamentals in data structures, algorithms, and data analysis, with a consistent record of turning coursework and self-directed projects into working, end-to-end applications.

Experience

Machine Learning Intern — FlyRank (Virtual)	Jul 2026 – Present
- Working through a project-based machine learning lifecycle — problem scoping, data preparation, model building, validation, and deployment — applied to a real-world business problem. - Building a capstone project using modern ML tooling and structured data analysis, designed for public deployment to demonstrate end-to-end technical and analytical ability.	

Education

B.Tech, Artificial Intelligence and Machine Learning	2024 – 2028
<i>M.S. Ramaiah Institute of Technology, Bangalore CGPA: 9.41/10</i>	
Senior Secondary (XII), Karnataka State Board — Science	2024
<i>Saraswati P U College, Kumta, Uttara Kannada, Karnataka 98.00%</i>	
Secondary (X), Karnataka State Board	2022
<i>Colobha Vithobha Shanbhag Hegdekar High School, Kumta, Uttara Kannada, Karnataka 100.00%</i>	

Projects

DNA Sequence Analysis System	Jan 2026 – May 2026
<i>Python, Bioinformatics, Machine Learning</i>	
- Built a bioinformatics application to analyze DNA sequences and surface genetic patterns from biological datasets. - Implemented sequence-matching and data analysis routines for efficient processing of genomic information. - Applied computational methods to detect similarities, variations, and significant patterns across DNA data, with an interactive interface for research support.	
Air Pollution Detection System	Jun 2025 – Mar 2026
<i>Python, Machine Learning, Pandas, NumPy, Matplotlib, Scikit-learn</i>	
- Developed an ML system to monitor and predict air pollution levels from environmental and atmospheric data. - Engineered a data preprocessing and feature extraction pipeline, then implemented classification and prediction models to analyze pollution severity and trends. - Generated real-time visual reports to support environmental monitoring and decision-making.	
Agri AI	Jan 2025 – Jun 2025
<i>Python, Machine Learning, Flutter, Firebase</i>	
- Built an AI-powered agriculture assistance app delivering crop recommendations and smart farming insights. - Applied machine learning techniques to agricultural data to improve recommendation quality, with cloud-based (Firebase) storage and retrieval of farming data.	
AI Chatbot Assistant	Jan 2025 – May 2025
<i>Python, NLP, Machine Learning, Flask</i>	
- Developed a chatbot that understands user queries and generates relevant responses using NLP. - Implemented text preprocessing and intent recognition to improve conversational accuracy, served via a Flask backend.	
Smart Career Assistant	Jan 2026 – Present
<i>Python, Machine Learning, Flutter, Firebase</i>	
- Developing a career guidance app that recommends career paths from users' skills, interests, and academic background using recommendation algorithms. - Integrating Firebase for authentication, profile management, and secure data storage behind a responsive Flutter interface.	

Technical Skills

Languages: Python, Java, C, C++, SQL
ML / Deep Learning: Machine Learning, CNN, RNN, Natural Language Processing (NLP), Scikit-learn
Generative AI: Prompt Engineering, Hugging Face, ChatGPT, Gemini, Claude, Replit (GenAI)
Data & Visualization: Pandas, NumPy, Matplotlib, Data Analysis, Data Analytics, Power BI

Frameworks & Platforms: Flask, React.js, Node.js, Express.js, Flutter, Firebase, MongoDB

Tools & Fundamentals: Docker, Data Structures, Algorithms

CERTIFICATIONS & JOB SIMULATIONS

- Tata — GenAI Powered Data Analytics Job Simulation, Jul 2026
- Tata — Data Visualisation: Empowering Business With Effective Insights Job Simulation, Jul 2026
- Tata — Cybersecurity Analyst Job Simulation, Jul 2026
- Deloitte (Forage) — MasterCard Cybersecurity Job Simulation, May 2026
- Deloitte Australia — Technology Job Simulation, May 2026
- Deloitte Australia — Data Analytics Job Simulation, Feb 2026
- Internshala — Full Stack Using AI, Jan-Mar 2026
- Office Master — Power BI, May-Jun 2025

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Executive Committee member, IEEE Women in Engineering Chapter
- Volunteered at TECHFEST, the college's technical festival
- Completed a Google Gemini workshop, building a chatbot project
- Attended 5+ hackathons and Preptember (United Latino Students Association, Bengaluru)

ACHIEVEMENTS

- Ranked 1st in Karnataka State Board (10th standard), 2022 — 625/625
- Ranked 11th in Karnataka State Board (12th standard) — 588/600
- Distinction, Junior level, Hindustani Classical Music (vocal)
- Distinction, Junior level, Harmonium Instrumental Examination
